

STEP 1: UNPACKING THE ACTIVEPURE MODULAR - R

Read manual carefully for proper use and optimal operation.

1. Take your ActivePure Modular-R out of the shipping carton and remove all protective materials.
2. Remove the unit from the protective poly bag.
3. Remove the blue tape that was securing the Front Cover from coming off during shipping.
4. Gently pull the Front Cover away from the unit. No tools are required, the Cover is secured with magnets.
5. Take all three HEPA Filters out of their protective poly bags and reinstall.

6. If you have the optional 3-cell Assembly Kit, open that carton and follow the Quick Start Guide and, **if you do not**, then continue to Step 7.
7. Reinstall the Front Cover by aligning the Front Cover with the unit and allowing the magnets to pull it securely into place.

NOTE: Unit will not operate if the Front Cover is not correctly attached.

8. Remove the protective film from the Front Control Panel.

STEP 2: MOUNTING THE ACTIVEPURE MODULAR - R

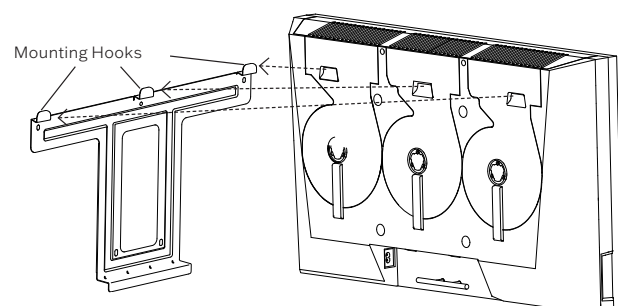

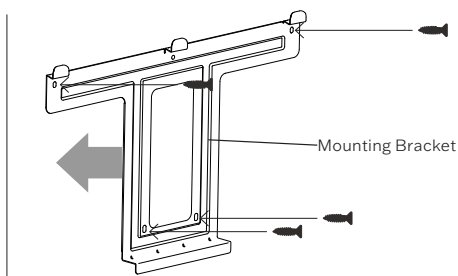

Unit is designed to be mounted on an interior wall.

1. Remove the Mounting Bracket (and hardware), Remote Control (2 AAA batteries needed, not included), and Power Cord from the brown box.

NOTE: Use of the Remote Control is not mandatory, but optional.

2. Find a suitable indoor location to mount the unit, preferably a flat interior wall away from the HVAC return duct and close to a working electrical outlet.
3. Place the Mounting Bracket at a predetermined position on the wall (we recommend the top of the unit is above eye level). Mark the precise location you want to place the (4) plastic anchors (provided), using a level if desired.

4. Drill (4) pilot holes on the marked spots using a 1/8" drill bit and push the (4) plastic anchors into the wall. If necessary, tap the anchor lightly with a hammer until it's flush with the wall.
5. Place the Mounting Bracket on the wall and align the holes to screw in the (4) 5/8" screws (provided).
6. Place the (3) open slots located on the back of the unit onto the (3) hooks on the Mounting Bracket and let it lock into place.
7. Plug the Power Cord into a working electrical outlet.
8. If the optional ActivePure 3-cell Assembly is installed, return to the **OPERATING THE OPTIONAL ACTIVEPURE CELLS** section on PG 2 of the 3-Cell Assembly Kit Quick Start Guide.

STEP 3: DIRECTIONS FOR USE

1. Press the **POWER** button once to turn the unit on.
AUTO will illuminate on the screen.
2. Press the **MODE** button to change from **AUTO** to **MANUAL** mode or **SLEEP** mode. The unit defaults to operating in **AUTO** mode when the unit is turned on and will operate 24/7.
3. If you do not want to have the unit operating 24/7, you can press **TIMER+** to set the **TIMER** from 1 hour up to 8 hours.
4. If in **MANUAL** mode, push **FAN+** button up to four (4) times to reach the highest speed (5th level) to initially clear the air in the room. Once the air is cleared, set to the desired Fan speed.

SETTINGS

-  **POWER:** Turns the unit **ON** and **OFF** (Standby)
-  **A-PURE:** Turns the optional ActivePure Cells **ON** or **OFF** (Optional – sold and installed separately)
- M** **MODE:** Adjusts between the **AUTO/MANUAL/SLEEP** modes. The device runs in **AUTO** mode by default.
 - AUTO:** **AUTO** icon will illuminate and will enable self-adjusting Fan speeds based on the PM2.5 concentration in the room.
 - MANUAL:** By pressing **MODE** once, the unit shifts to **MANUAL** mode and the **AUTO** icon will not be illuminated any longer. In **MANUAL** mode you can set the desired **FAN** speed.
 -  **FAN:** Adjusts the 5-speed fan **UP** and **DOWN**. The curved bars display the Fan speeds from 1 (low) to 5 (high)
 -  **SLEEP:** By pressing **MODE** twice (2x), the **SLEEP** icon will dimly illuminate and the unit will reduce to the minimum Fan speed, and the Control Panel will no longer be illuminated.
-  **RESET:** Clears the Maintenance Reminders after performing routine maintenance. (See user manual for maintenance)
-  **TIMER:** The **TIMER** can be set for 1 to 8 hours. The display will show an increase in hours set 1H, 2H, → 8H as you press **TIMER+** to cycle through the program. The display will show a decrease in hours set as you press **TIMER-**. At the end of the set time the unit will turn **OFF**.

REMOTE CONTROL

1.  **CHILD LOCK:** Press and hold for 3 seconds to lock and unlock the Child Lock feature.
2.  **A-PURE:** ActivePure Cells **ON/OFF** (Optional - sold and installed separately).
3.  **TIMER DOWN:** Press to decrease the amount of time set on the Timer.
4.  **RESET:** Press and hold for 3 seconds, while unit is operating, to reset the Filters.
5.  **POWER:** Press to turn the Power **ON/OFF**.
6.  **FAN:** Cycle through the (5) Fan speed settings from lowest to highest. When the Fan is at the highest setting, pressing the button again will return it to the lowest setting.
7.  **TIMER UP:** Press to Increase the amount of time set on the Timer.
8.  **MODE:** Press to switch between the **AUTO/ MANUAL/ SLEEP** modes.

CONGRATULATIONS!

You are now set up to receive the benefits of your ActivePure Modular - R.

For instructions on Notifications and Maintenance, please refer to the owner's manual.

READ MANUAL CAREFULLY FOR PROPER USE AND OPTIMAL OPERATION
